Updates

Refers to EGM 2019, released in March 2019

1. Overview of the EGM data updating

1.1. General

Updates carried out for EGM 2019:

- Update of the Administrative Boundaries theme (BND):
 - Full generalisation from EBM v12.0;
 - French overseas territories added: Saint-Barthélemy (BL), French Guiana (GF), Guadeloupe (GL), French part of Saint-Martin (MF), Martinique (MQ), Réunion (RE), and Mayotte (YT);
- Update for the Hydrography theme (HYDRO):
 - Full generalisation from ERM v11.1 for all countries maintained in ERM and satisfying generalisation quality requirement.
- Minimal update of the Settlement (POP) and Transportation (TRANS) themes:
 - New selection criteria;
 - Full generalisation from ERM v11.1 for all countries maintained in ERM and satisfying generalisation quality requirements;
 - No manual correction. These data may not be entirely compliant with the data specification.

The EGM metadata was updated and its compliance with the INSPIRE metadata regulations was checked.

1.2. New attributes and features

A new feature class, NUTS_3, has been added. It portrays the statistical regions of level 3 from the Nomenclature of Territorial Units for Statistics (NUTS). The objects are in compliance with the administrative boundaries.

1.3. Database specifications

The EGM database specifications (version 2019) compliant with EGM data 2019 have been released.

2. Errors corrections and data completeness

2.1. New countries

This year's release contains data from the same countries than in last year's release.

2.2. Intertheme consistency

The consistency between features classes from different themes has been improved. A new coastline has been generated for the countries GB, IE, ND, and PL.

2.3. Error corrections

Some topological and attribution errors were corrected in layers of BND and HYDRO themes.

2.4. Other changes

None.
